DETAILED ACTION

The preliminary amendment, which included amendment to claims 11 and 12, filed on 1/3/2006, is made of record. Claims 1-17 are pending.

Information Disclosure Statement

References cited in the Information Disclosure Statements, filed on 3/24/2005, 6/16/2006, 9/6/2005 & 7/25/2006, are made of record.

Claim Objections

Claims 2 and 11 objected to because of the following informalities: these claims recite "no greater than". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasukawa et al., Investigative Ophthalmology & Visual Science, 40(11), 2690-2696, 1999.

Yasukawa et al., teaches use of TNP-470 conjugated to water-soluble polyvinyl alcohol (PVA) through hydroxyl group of PVA for use as antiangiogenic agent in the treatment of neovascularization. The teaching clearly meets the limitation of claim 1, 8 and 10. See entire document. Especially see page 2691 for making the conjugate (first

column, third paragraph) and for the activity of the conjugate (second column, paragraphs 2-6).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasukawa et al., Investigative Ophthalmology & Visual Science, 40(11), 2690-2696, 1999.

Teachings of Yasukawa et al., as discussed in the above 102 rejection is incorporated herein. As noted above Yasukawa et al., teaches the instant invention as it pertains to claims 1, 8 and 10.

Instant claims 2 and 3 further limit the molecular weight of the polymer. Yasukawa et al. teaches use of readily available PA of average MW 220,000. It would be obvious to one trained in the art to use PVA varying molecular weights as it is known at the time of instant invention that molecular weight of polymer is variable in drug delivery system.

Allowable Subject Matter

Claims 4-7, 9 and 11-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Said claims would be allowable as prior art search in the related area did not suggest or teach the composition and method of use embraced in the instant claims.
